Council of the School of Physical Sciences – Graduate Student Representative

I am a second year Cosmology PhD student in the Department of Applied Mathematics and Theoretical Physics. I hope to represent you as the graduate student representative to the Council of the School of Physical Sciences for the coming year. I would like to use this as an opportunity to provide you with a voice at the highest level of the SPS, to ensure that decisions are made with graduate student input and with our best interests in mind, and to help provide the best environment possible for graduate students within the School.

I have experience in this area within both my college, Trinity Hall, and my department. Within DAMTP I am a student representative to the Graduate Education Committee, providing the graduate students within the department with representation and support on academic issues. In my college I hold the position of MCR Treasurer, and as a part of this role I provide representation for the graduate community on several college committees, encompassing a wide range of issues. I intend to use the skills and understanding that I have gained from these roles to provide effective representation for graduate students on the Council of the School of Physical Sciences.
