

Hi, I'm currently a third year studying Physical Sciences at Clare College. I've enjoyed studying Physical Sciences at every level of the NatSci Tripos, and feel as a finalist I have a good understanding of the undergraduate course. As a representative, I would endeavour to include the views of everyone within the School, particularly from the Mathematics and Geography Tripos of which I don't have personal experience.

I was elected as the First-Year representative for the Computer Science Tripos Committee, as the NatSci rep, so have experience in representing the views of a student body and pushing for the changes you want to see.

I hope to continue this as your representative for the School of Physical Sciences.
