

I am a second year English student at Gonville and Caius College. I am dedicated and resourceful, passionate about the delivery and organisation of our education, and eager to understand the decisions that shape it. For the past year I have been an Undergraduate Representative within the English Faculty and have engaged in discussions at Teaching and Learning Committees, Director of Studies Meetings and Faculty Board Meetings. I have been active in proposing and implementing innovations such as establishing a Student Committee and working to increase student interest and participation in faculty concerns. I am well practiced in putting the student case forward and gathering opinions, data and evidence from the student body in order to show the weight and reasons behind the concerns. With this experience I feel I am well placed to take on the role of School Representative for Arts and Humanities and would greatly appreciate your support.
