Graduate Student Representative
Candidate to the Council of the
School of Technology

2nd year Ph.D. Student in
Engineering (Construction
Information Technology
Group)

Cambridge graduate students represent a large proportion of the University that “dreams big”. I am dedicated to convey your voice to the highest level of decision Boards and build a vibrant community of active leaders.

Technological changes affect us and the Faculty in various ways. Inspired from my research background, my vision is to make a step change during decision making processes (e.g. resource allocation and capital project approvals, uncertain post-Brexit prospects) for the benefit of all of us. As your representative, I will discuss with you to ensure your concerns are addressed by the strategy set from the Council.

Serving in the Cambridge University Engineering Society (CUES), I have learned to listen to graduate and undergraduate students’ needs on a wide spectrum and invited industrial partners to share their experiences based on our needs. Budgeting and resource allocation is a key aspect of this position as well.

I am also an active STEM Ambassador promoting Engineering, Sciences and Technology to younger generations for a career in STEM in the U.K. In the past, I served as President of the IEEE Power & Energy Society in Greece and graduate representative of the ASCE student society while at UCLA (U.S.).

I hope to use my experiences and negotiation skills with the Members of the Council to represent your voice.
