

Preclinical Medical and Veterinary Medicine Examinations Timetable September 2020 (2nd MB / 2nd Vet MB)

V1 published 3 August 2020

The following pages show the timetable for online examinations for preclinical medicine and veterinary medicine via Moodle.

If you have questions about:

- the mode of assessment, contact your department in the first instance.
- assessment, then consult the FAQs available online [here](#), or contact your Tutor.

If you have concerns about taking the assessment due to illness, caring responsibilities or lack of facilities, then contact your Tutor without delay.

Note on the timetable

All times shown are GMT+1 and this timetable information is also available to view in CamSIS self-service.

The assessment window will open at midday and close at 5pm, however time spent per assessment is limited and once you have started the assessment, you must complete it within that time. Students have been sent an information sheet on how much time should be spent on each assessment. In case of query, please contact your Director of Studies.

If you are a student with approved examination adjustments, then you should take the extended time normally awarded.

Moodle

Prior to the assessment, your department will email you a link to the assessments in Moodle.

You will be able to access the course from 9am (GMT) 3 days before your assessment is scheduled to begin. At this point, you will be able to see the quiz tool, however this will be greyed out and not accessible until the assessment begins. Demo quizzes will be available for you to interact with and familiarise yourself with the tool.

You are encouraged to log in to the assessment prior to the start time to ensure that you can access the course. If you have any problems accessing the course, then you must email moodlehelp@uis.cam.ac.uk
