Brief statement:

Liu Shangzhi
I am Shangzhi, a 2\textsuperscript{nd} year economist at King's. I'm willing to contribute to the Council and School through the dedication of time and energy into understanding the issues faced by students across faculties and departments. Looking forward to working together with subject representatives in each faculty. The many liaisons across subjects developed within my college will help with intercepting and understanding concerns that students from the school may have as a whole. There is much to discover through working on the ground with people.
