

Council of the School of Technology Election

Tek

Manifesto

Candidate:

Tek Kan Chung (tkc26)

I am a 2nd year engineer from Pembroke and I've enjoyed spending my spare time representing student views in the Student-Staff Joint Committee (SSJC) and also the Pembroke Junior Parlour Committee in the past year – because I believe that the university should be a service provider satisfying the needs of its students, and not simply a degree certificate factory.

I want to see greater transparency in the decision-making process in the Council level. And as your representative, I would be the bridge between you and the Council.

I hope to see people enjoying the subject they love. Ensuring enough provisions are allocated to student well-being and mental health support would be part of the solution. I can't do that without your vote!
